SOURAV ROY CHOWDHURY

AWS Cloud Implementation & Infrastructure | Terraform | ECS Fargate | VPC | RDS | Linux
Kolkata, West Bengal, India | souravrchowdhury2020@gmail.com | +91-8013610018
linkedin.com/in/sourav-roy-chowdhury-967414107 | github.com/SOUROYAL123/Legacylens-automation

PROFESSIONAL SUMMARY

Cloud implementation professional moving from 3D animation production into AWS infrastructure. Designed and provisioned a two-AZ AWS environment entirely in Terraform: VPC, ECS Fargate, ALB, encrypted RDS PostgreSQL, IAM, Secrets Manager and SSM-based secure access. Also build and operate a live Node.js/PostgreSQL production system for a restaurant client. Strong in infrastructure-as-code, Linux, networking, containerization and security hardening, with a production-pipeline background in tracking deliveries and coordinating handoffs. Preparing for the AWS Solutions Architect – Associate (SAA-C03) certification.

TECHNICAL SKILLS

- **AWS:** EC2, VPC, ECS Fargate, ECR, ALB, RDS PostgreSQL, IAM, Secrets Manager, Systems Manager Session Manager, CloudWatch Logs, NAT Gateway, VPC Endpoints. Lab-level: Transit Gateway, Site-to-Site VPN.
- **IaC & Containers:** Terraform, Docker (multi-stage builds, non-root users), ECR lifecycle policies, Git, GitHub
- **Security:** Security groups, scoped IAM roles, Secrets Manager, SSM Session Manager (no public SSH), encrypted RDS, webhook signature verification
- **Linux & Networking:** Ubuntu, Bash, systemd, TCP/IP, subnetting, route tables, security groups, ss, tcpdump, traceroute, netcat
- **Databases & Backend:** PostgreSQL 16, SQL, Row-Level Security, Node.js, REST APIs, Twilio and Razorpay webhook verification

AWS IMPLEMENTATION PROJECT

Two-AZ AWS Infrastructure for a Node.js Backend | Personal project, ap-south-1 | github.com/SOUROYAL123/Legacylens-automation

- Provisioned the full environment in Terraform: public, private application and isolated database subnets across two AZs, with NAT Gateways and separate route tables per tier.
- Containerized a Node.js service with multi-stage Docker builds and deployed it on ECS Fargate behind an Application Load Balancer, with ECR lifecycle policies.
- Deployed an encrypted RDS PostgreSQL 16 instance in private subnets, reachable only from the application security group and an admin bastion.
- Removed public SSH access: admin and database access go through SSM Session Manager, VPC Interface Endpoints and SSM port forwarding.
- Stored Terraform-generated database credentials in Secrets Manager and injected them into ECS tasks at runtime with scoped task execution roles.
- Debugged connectivity and database issues with ss, tcpdump, traceroute, netcat, pg_stat_activity and pg_locks.
- Built a lab Transit Gateway connected to an IPsec Site-to-Site VPN with a simulated on-premises router.

PROFESSIONAL EXPERIENCE

Founder & Cloud/Automation Developer | LegacyLens Automation, Kolkata (Self-employed) | Jul 2022 – Present

- Built and operate a live WhatsApp ordering and payment system (Node.js, PostgreSQL, Twilio, Razorpay) for a restaurant client.
- Investigated and resolved production incidents on Railway and Render hosting, tracing each to root cause.
- Designed a multi-tenant PostgreSQL schema with Row-Level Security to isolate client data.
- Added webhook signature verification and credential hardening to protect order and payment data.
- Communicated directly with the client on issues, updates and delivery.

3D Animator & Production Pipeline Coordinator | Thotosynthesis Pvt. Ltd., Kolkata | Feb 2022 – Jun 2022

- Tracked daily pipeline progress across modeling, rigging, animation and lighting, identifying bottlenecks early to keep deliveries on schedule.
- Coordinated asset handoffs between artists and technical leads, resolving pipeline errors and missing-dependency issues.
- Standardized file naming, asset directory structure and versioning to streamline team workflows.
- Ran daily status standups and shot reviews to keep work aligned with production milestones.

3D Animator | Dream4d Animation, Kolkata | May 2021 – Feb 2022

- Led and mentored a team of animators, running shot reviews and dailies.
- Worked with rigging and pipeline supervisors to find asset problems and resolve production bottlenecks.
- Standardized shot workflows and quota management to deliver episodic and cinematic sequences on schedule.

3D Generalist | HiTech Animation, Kolkata | Sep 2019 – Jul 2021

- Delivered 3D asset creation, character animation and scene assembly for broadcast television and episodic productions.
- Worked with department leads and technical directors to troubleshoot pipeline errors and keep asset handoffs smooth.
- Delivered high-volume episodic shots on tight production deadlines.

Animation Lead | AATS Studios, Kolkata | Sep 2018 – Aug 2019

- Directed 3D character and asset animation through full production cycles to milestone deadlines.
- Partnered with rigging and technical art teams to troubleshoot deformations and streamline handoffs.
- Reviewed shot progress and resolved asset bottlenecks.

Independent Tutor, Mathematics and Science (Class 7–10, CBSE/ICSE) | Kolkata | Jul 2022 – Present

- Teach and explain concepts to students and parents, with regular progress communication.

EDUCATION & CERTIFICATIONS

- Preparing for AWS Certified Solutions Architect – Associate (SAA-C03)
- B.Sc. (General), Second Division | New Alipore College, Kolkata | 2006
- Matriculation | A.K. Ghosh Memorial
